

# Product Development Associate

## Life Sciences – B2B

BioAnalyt is a product innovation company based in Berlin, Germany that develops and markets portable devices to measure micronutrients in real-time for fast and evidence-based decision making. We specialize in making nutrition visible by bringing the laboratory to the sample in a cost-effective way for low-resource settings. Since its founding over 10 years ago, BioAnalyt has developed and commercialized 6 iCheck devices for measuring vitamins A and E, total carotenoids, iron, and iodine in food and biological samples, primarily supporting application areas in nutrition programs, animal health, and food quality, particularly for fortified foods. BioAnalyt's latest innovation area surrounds point-of-care diagnostics of nutritional status, and specifically iron deficiency and anemia. iChecks are currently used in over 60 countries by food and animal feed producers, governments, NGOs, and researchers.

To successfully expand further product development activities, we are seeking for the **earliest possible date a Product Development Associate** (m/f) based in Berlin or Teltow. In this role, you are part of our Product Development Team and you will develop new and enhance existing products and technical solutions in the field of analytics, optics, and spectroscopy.

### Major Tasks:

---

- Active contribution to product development projects
- Conception of your own projects (new products, product optimizations) up to the start of production, including:
  - Planning and coordination of the projects
  - Planning, execution, evaluation, and monitoring of experiments
  - Transfer to serial production and documentation (according to QMS standard)
- Planning, execution and documentation of external and internal feasibility and validation studies
- Monitoring of costs and deadlines in projects
- Maintenance of QM documentation; inspection & control of equipment
- You cooperate internally with the marketing and sales departments, and externally with partners and suppliers.

### Qualifications and skills:

---

- You have a successful academic background in natural sciences (M.Sc.) or equivalent work experience in the life sciences related industry.
- You have a good technical understanding
- You will have a high level of initiative, results orientation, and innovativeness.
- You can independently familiarize yourself with scientific topics and develop solution strategies in a team.
- You can create reports & presentations for customers, authorities, or suppliers.
- You can structure your time and tasks effectively
- You will be highly organized with a hands-on approach and a can-do attitude.
- Working with common office software packages and project management tools
- Very good English and German

### What we offer:

---

- International environment, with passionate and young team of different nationalities.
- Friendly working atmosphere with regular team-building events
- Innovative and interesting projects, and related training
- Opportunities for long-term employment with individual employment relationship, promotion of health and work-life balance
- The opportunity to take on responsibilities, bring in own ideas and manage work time flexibly
